

SUPPORT ❖ OUR OPERATIONS

→ Free for You and Me and All

If you need support – then please get in touch and I'll look into it. **However** – this page is about *supporting us* and *the work I am doing* here for everyone. Supporting the maintenance and evolution of this resource.

Everything here is free for all. There are no paywalls. There are no subscriptions. There should be no obstacles to free access into valuable insight. This is not about stuff – *this is about our lives and our conscious evolution.*

✱ ON THIS PAGE • Current Operations ↴ • Ways of Supporting This ↴ • Future Forecasts ↴

What's Happening – Current Operations

✱ **The short version** of what goes into the productions you see here:

- I record or write the "organic" source materials
- ... then design or generate the supporting graphics etc.
- ... and edit the content into a respectable shape for sharing
- ... run transcripts and prepare subtitles for all recordings
- ... package it for publishing here and on multiple platforms
- ... engage with people who have related comments and questions
- ... prepare shorter edits for busy and attention-challenged folks
- ... then muse over what's next in line, dig and reflect and research

- ... and also write all the code for this website and media workflows.

I do all of this for free – aside everything else I have going on.ⁿ I get no compensation for it – save for the occasional informal contribution. I keep platform monetization options off to minimize ads litter. You will *never see ads on this website*. I don't have a trust fund or steady patrons to support it – but it's the sum of my life's works and accumulations, so I keep steady at it.

ⁿ *We have a budding property on the hillside of Java – with 22 cats and 3 dogs and land to toil. Need to keep it operational and happy. Then whatever professional work I squeeze in between – translation and code ops. And whoever then has questions or needs to have their spine sorted or whatever fixed – I can't not help where I actually can, more so if other options are limited.*

What You Can Do — Ways of Supporting This

✱ **It will all keep growing without you.** It will grow broader *with you*. This is *not for me*. This is for *all of you*. This is what I have to give — and there's plenty more to come. If you wish to support this in *your whichever way and capacity*, the basic options are:

-  **Practical:** You can pool together quality research. You can source or generate supporting materials. If you have the basic skills, we can collaborate with media processing. (I'll set you up with how-to resources and simple workflows.)
-  **Social:** You can share what you find here with others. You can engage on our social media channels. You can provide constructive feedback. You can discuss the themes here with friends — and see what comes, might be interesting.
-  **Financial:** You can drop a contribution for example via PayPal at <https://www.paypal.me/CMSWares>. Your donations will be marked first and foremost

toward server etc. bills and other expenses related to the development of this resource.

...and undoubtedly there's plenty more – please drop a note and share your thoughts and inspirations. If your works intersect with what I do – that's excellent and I'd love to hear about it. I look upon it all as "*meta-support*" – in service of the greater needs of our day, transcending individuals who advance the emergence of solutions. Perhaps there are threads of synergy for us.

What's Brewing — Future Forecasts

✱ **So all of this is growing yes.** We look at a fairly broad roadmap — or roads-map — ahead of us, one naturally born from everything that's been in the works for the last 30 odd years. Yes — all of this is very literally the integration of my life's work.

-  **Content:** Continued production of a broad spectrum of content in various media, tuned for diverse genres and audiences. In extension, a *"zoomable ecosystem"* where the *seed content is transformed* into various more compact and extended formats — to *accommodate* various temperaments and angles of interest, to eliminate *entry thresholds* for insight.
-  **Research:** Most directly relevant is *"essence distillation"* from major classic traditions of conscious cultivation. In related works, the mapping of significant world myths and tales, their motifs and archetypes, for upcycling into supporting narratives. In the abstract, *"pattern*

harvests" from every concern domain of our existence – into one vast loom of insight.

-  **Technology:** I keep developing my in-house A×O *code-for-all-ops* framework, in the works for 15 years now, that facilitates *publishing, research, and production* workflows – along with *website deployment, data operations*, and so on. Over the last year, it has extended into models for *coherent AI-collaboration*, bridging artificial and organic intelligence.

Dedicated projects are already open and rolling for much of this – all maturing in its season, culminating towards an extensive *suite of solutions* for all of you and all of us. **Solutions for what?** Solutions for the challenges of life, for supporting our conscious evolution, for opening perspectives and establishing scaffolds for a more *peaceful, clear, and harmonic* abiding for you all.

OpenSeeSame – Bridges of Understanding

Our fundamental obstacle to becoming wiser and more perceptive – both individually and as a collective – is excess emphasis on *distinction*, the preoccupation

with individuation and standing apart. "**Open See Same**" is designed to *break open these sad silos* of separation, *opening what shouldn't be closed* – and unveiling bridges of understanding across diverse fields and communities. Opening soon at: <https://openseesame.com> ▶

AXO.Works – Full Stack Ops Technology

In-house tech framework supporting all of these ops – with fields and code works for **AXO.PUB**, **AXO.DEV** and **AXO.DIG** already mature and working – is being extended with **AXO.AOS** to steer broad-concern AI-powered operations. R&D in progress, into a comprehensive knowledge processing ecosystem. Open and free codes and models – a contribution to advance the insight commons. Samplers at: <https://axo.works> ▶

Book Projects – Fiction and Philosophy

How many books can you churn from all this? Fiction and fable – serious and technical – and I'd write all day long if I had the luxury. Aside skeletons and sketches, there are concrete works underway.

Our **Mooland Tales** ▶ epic fables universe, organic grass-fed produce, is at 40K+ words and growing. All the talks on record are shaped into tidy compilations. Plenty of topical shorter pieces budding. And then all the derived works – incl. AI-supported transformation from organic sources – an order of magnitude more. Wordy worlds are looming in the horizon.

In Closing – Thank You

Thank you for your interest and the kind attention invested. **Did some of this connect** – did you find some value in it – for *you individually*, or for *all of us as a whole*? If you care to participate *in your any way*, share for the growth of these works – please get in touch yes. I am but one little individual here – together we're a thriving collective. Your contributions are much appreciated.
