Rich comments on the Metacognitive Tree piece. Say: "Based AI Jesus" — "This is pure ChatGPT". LMAO alright then! I'll take these as compliments.

However folks. We really don't need AI for coherence. OI not AI. Straight and raw analog organic iteration. Knowledge embedded in the fabric of existence itself.

I do train AI instances in the meta-schemas though. Prismatic trees for the pattern-matcher's inquiries. Groovy things churning up. Human at the helm though.

Then – uncut schema dump over a noon coffee session. Let's see Veo or Sora replicate this. Wizards, please? This is the organic midjourney. We are more than AI.

"Based AI Jesus. This is pure ChatGPT." Comments to my Metacognitive Framework video. So let's just boot it straight out the organic hive – pattern pool back there, without cuts.

We enter the Tree of Cognition. From the existential hosts – **#Emptiness** and **#Fullness**. Their primal tensions – **#Inward** and **#Outward**, Expanding and Contracting, etc. and landing at the **#Mirror** Threshold Membrane. The plane where reality is compiled. In there we meet the **#Seer** and the **#Seen**, Energy and Matter, Consciousness and Substance.

From this unary monadic plane into permutations – The quad binary combinations. **1.** We have **#Structure**: The blueprint, the subject constraints. **2.** We have **#Adaptor**: Continuity, our evolutionary reflections. **3.** Then we have **#Catalyst**: Reactor, our interactive plane. **4.** And we have **#Pervasion**: The network of meanings and relations.

Then onward into the triad, the octagon, three-part combinations. **1.** We have at the baseline the **#Vessel** – subject presence in a vehicle. **2.** Then we look outward, orient – there is an environment out there – **#Vision**. **3.** Then we take **#Impressions** from the environment – feelings, impressions are landing in. **4.** From these, **#Aspirations** – potentials, hypotheses are formed.

5. Onward into the establishment of **#Will** – direction based on what we have encountered. **6.** And to the field of **#Works** – engagements, transforming the environment. **7.** Then it's **#Harvest** time – we reap the yields from our field and begin to integrate, reconcile them. **8.** And ultimately we come to a field of **#Alignment** – consummation of our life-cycle.

So from the octagon we return then to the quad. We look at the more abstract plane of underlying

influences – the elements. And we finally encounter the **#Seer** and the **#Seen**, the fundamental duality – polarization of our consciousness. Beyond that, we rise to the plane of **#Reflections**, where there is neither this nor that – where simply reality itself is expressed without subject.

And onward, we overcome the tensions, the Pushings and Pullings of existence. We encounter the **#Fullness** of all that is – in states of contemplation typically. And we enter the **#Emptiness** of all that is, the resolution of all things – including the imperative for existence itself.

So that's the basic lay of the land – and I hope that it makes you happy. There is no need for AI for any of this. These are ancient fields of insight. All right. So be well and build up the tree and matrix of your consciousness into a well-rounded systemic whole. That's all. See you.
