Vintage material from the 2010-2012 epoch of early unfolding. You are reading an *unedited artifact* from the old journal. Reader discretion is advised.

While the buzz of the day is focused on inbound crystal energy and transmutation of human nature, I've unfolded the Celestial Mandala of Crystal Maitreya for the systematic cultivation of luminosity, ascending to the crown of awareness. The Sanskrit word "Maitreya" means "Benevolent", and the word "Buddha" means "Awakened-One". Much like the Sun and Moon in our sky, such concepts are universal and unbound by the particulars of faith and culture. The carrying intention is to illustrate the dance of the universals of awareness, independent of narrow and superstitious belief.

If you can count to 16 and grasp the binary principle (ON/OFF = 1/0), you can contemplate on the celestial appearances of Crystal Maitreya in a cardinal wheel of sixteen permutations over A) Primal Reality, B) Causal Worlds, and C) Phenomenal Worlds. This is the stuff of legends; and these are the spheres of archetypal awareness explored by sages and saints since the days of the Sun and Moon over Earth under Heaven. The patterns of nature are the source and the unifier of

beliefs; therefore, seek to uncover natural and straight human truths in this elementary mandala.

Whatever your particular religious or scientific symbols may be, we all live in a world shaped (or created) by an interplay of [+] Prime Energy / Awareness and [-] Root Matrix / Patterns. When active and luminous [+] Dynamis (Yang) meets receptive and supporting [-] Neutralis (Yin) in a self-sustaining [±] Balance Intermix

in the $2^1 = [2x]$ Primal Reality, the multiplying $2^2 = [4x]$ Causal Worlds and $2^3 = [8x]$ Phenomenal Worlds come into being. These domains of awareness are a repository of patterns revealing the foundational unity in mysticism, spirituality and religion.

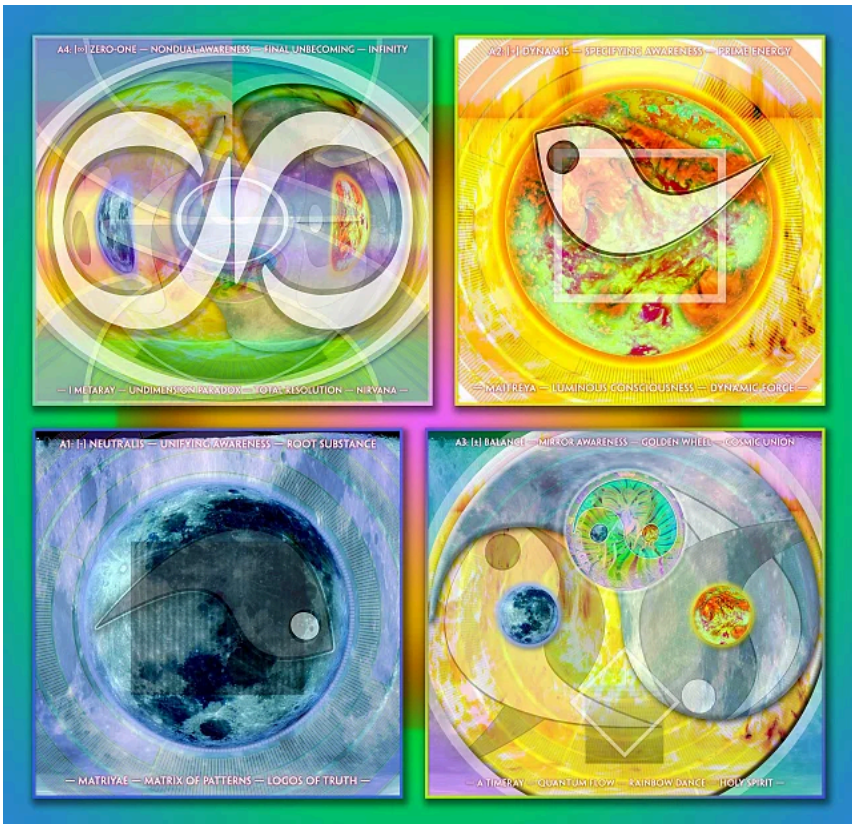

The path leading away from chaos and conflict is a path of sharing and universalization. Conflicts are a particular world of languages, while awakening is the universal stuff of experience. When pure awareness shines on the canvas of prime patterns, the world transforms from a fragmented and unpredictable field of anarchy into a symmetric display of complementary patterns. As all composites in the world follow the same elementary laws of physics, and as inner awareness and the phenomenal world are inherently married, the wisdom embedded in patterns is versatile and universal.

I've given 16 illustrative names to the 16 archetypes, a play of characters with three anagram series on three levels. The peak of the physical and phenomenal realm is "Maitreya Sananda". Again, "Maitreya" means "Benevolent", and "Sananda" means "with Son". These are the three layers of descending luminosity – A) Primal Reality: [+] Maitreya, "Benevolent"; B) Causal Worlds: [++] Maitreya Buddha, "Benevolent Enlightenment"; and C) Phenomenal Worlds: [+++] Maitreya Sananda, "Son of Benevolent".

Then, in order of derivative emergence – [+] Maitreya is Benevolence, [++] Maitreya Buddha is the Awakening of Benevolence, and [+++] Maitreya Sananda is the Beloved Child of Benevolence. Maitreya – "Pure Awareness", "Luminous Energy", "God Is Balance", "Conscious Spirit": Harmonize your parallel perspectives; seek the unifying pattern in the echoes of the shadow; and immerse yourself in the luminous wisdom of primal energy!

≡ Intellect [Sphere of Awareness]: Primal Reality — 4x Maitreya ≡

Here is the primal world of pure energy and symmetric patterns; their interplay in a luminous wheel of reflections; and the undivided resolution following their embrace in silence. These are the original seeds and root spheres of universal being, experienced as the

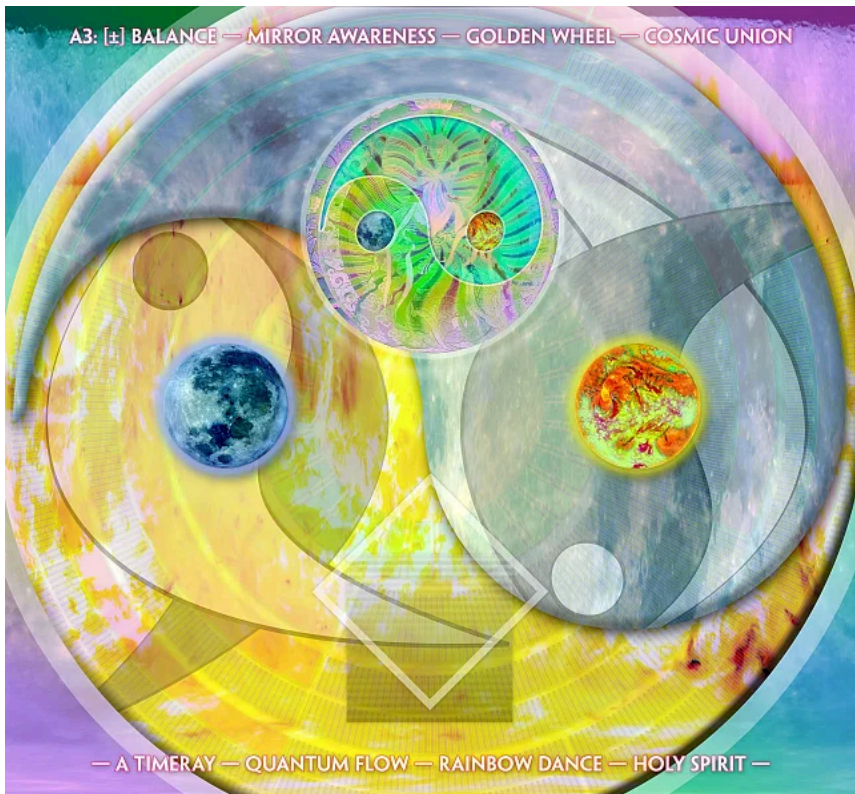

primal domains of luminous wisdom and ominous tranquility; their primal dance in unity; and their final sphere of absolution. When contemplating, make these spheres the entirety of your unified awareness.

≡ Heart [Sphere of Experience]: Causal Worlds — 4x
Maitreya Buddha ≡

Here is the causal world of quaternary influences and orientations; four fundamental forces governing the attitudes and objects of the phenomenal world; four cardinal beacons on the path of ascending awareness. These are the subtle spheres of composite existence, experienced as the cardinal domains of introverted, observant, interactive and universalized orientation. When contemplating, make these spheres your extrovert and introvert hemispheres, the principal fields of emotion and intellect, and observe their interplay and resolution.

≡ Body [Sphere of Manifestation]: Phenomenal Worlds — 8x Maitreya Sananda ≡

Here is the phenomenal world of principal states and transitions; eight archetypal situations of the triune human Body-Heart-Intellect; an eightfold path of the twenty-four elders from the darkness of nescient birth to the luminous crown of ascension. These are the manifesting energetic spheres of existence, reflected as the journey of the embodied human self. When contemplating, make these spheres and states of consciousness one with your Body, Heart and Mind, and reflect on the course of your experience across the refined archetypes of embodied awareness.

The straight eightfold path of ascension, from the
receptive Dust of Earth to the luminous Light of
Heaven, is a cognitive lifecycle that passes through the
cardinal and ordinal stations of human awareness,
cultivating the Intellect, Heart and Body from the dawn

of awakening to the illuminating fields of infinite balance. The three worlds – Primal, Causal and Phenomenal – move in parallel from East to West and South to North (on the flowchart). Here are the locations of the sixteen stations for conscious exploration:

This series encodes the basic pattern for cultivating a celestial rainbow body at the inner Himalayas. Symmetric contemplation of balanced archetypes hastens the process of conscious integration, increasing the saturation of celestial rays of awareness that equalize, rejuvenate, transform and crystallize the patterns of the mind. To resolve the anxiety of the

human situation, turn your neural network into a harmonic spectrum of crystal streams. Optimized awareness by means of meditative neuroplasticity – a process tested by time and proven throughout the history!

*A sample implementation of the systemic Wisdom Flow
mandala for archetypal contemplation.*

**Contemplate on these archetypes by means of
receptive internalization;** reflect on the practical matrix
of systematic balance; and awaken the luminous spirit
of enlightenment in your thoughts. Then construct the
Crystal Mandala in your heart and enter; embark on the
epic journey of Seven Heavens and behold the Kingdom
of God within; and fulfill your dormant human potential
by unveiling the pinnacle of conscious luminosity! This
is the heart of the Crystal Maitreya; and the essence of
the spiritual quest I've come to know and experience
over the years. Bodhisvaha!
